

## Introduction

**DocQC™** is a tool for automation of Quality Control (QC) checks that have historically required multiple, time-consuming cycles of manual review. Checks of various complexities are programmed leveraging cutting-edge technologies. These checks are augmented with Artificial Intelligence and Machine Learning algorithms guided and trained by your document subject matter experts to increase efficiency and effectiveness of your QC process with each use. **DocQC™** streamlines the document QC process automating the execution and reporting of standard checks enabling your experts to focus on the science, analyses, and generation of results.

## Functionality

- **Ability to execute complex QC checks** on items referencing source information **in other sections of the document and/or other documents altogether**
- Ability to **compare documents to source:**
  - Tables/Figures/Listings (TFLs)
  - Datasets (e.g., SDTM, ADaM)
  - Patient Safety Narratives
  - High-Level Summary documents
  - Clinical Study Reports (CSRs)
  - Risk Management Plans (RMPs)
  - Publications and posters
- **Flexibility to accommodate documents of different types**, e.g., PDF®, MS Word®, etc
- Ability to **automatically apply standard QC checks**
- **Custom checks can be added** to make your QC process more powerful and tailored to meet the specific needs of your organization's standards/templates:
  - Taxonomies
  - Configurable QC checks engine
  - Ability to add new/custom QC checks
- **Configurable Rule Engine**

## Key Features

- **User-friendly interface** for viewing and managing your QC check repository across several levels
- **Ability to customize and introduce new checks**
- **Repository** contains standard checks "out of the box"
- **Real-time and batch/scheduled execution** options
- **Checks executed automatically** on new versions/updates of documents
- **QC Reports** generated to detail failed checks, instances and locations for the QC reviewer
- **Performance Metrics Reports** to track quality of your documents and your processes
- **Flexible to customize** with configurable rule engine
- **Ability to compare the documents with source references**
